	to attend special study groups. Recreational activities included more reading, skiing, and other sports.  Curriculum  the courses effered at the Moscow Pharmaceutical did not include studies related to biological, chemical, or radiology warfare.  the following courses of study	50X1-HUM
	to attend special study groups. Recreational activities included activities, skiing, and other sports.  Curriculum  the courses effered at the Moscov Pharmaceutical did not include studies related to biological, chumical, or radiology warfare.  the following courses of study at the Institute:  First Year: Physics Chemistry (general) Mathematics Latin Anatomy	50X1-HUM

CONFIDENTIAL

50X1-HUM - 3 -Fourth Year: Forensic Chemistry Pharmacology Organization of pharmaceutical work Technology it was not necessary to attend all of the scheduled lecture 50X1-HUM 6. The length of time required for outside preparation varied with each hours. two hours per subject was the maximum length subject. 50X1-HUM of time ever devoted to preparation for daily classes. 50X1-HUM 50X1-HUM 7. Research 50X1-HUM no research projects at the Institute which were concerned with biological, chemical or radiological warfare or atomic medicine. 50X1-HUM Medicinal Compounds 50X1-HUM all compounds necessary to the production of various 9. any type chemicals 50X1-HUM medicines were available in the USSR and not were imported. a recently developed bitter-tasting anti-biotic, "chlorayestin" was very effective in the treatment of digestive disorders and dysestery. This mediche was prepared in powder form and was soluble in milk, water, or fruit juice. 50X1-HUM 10. Respiratory infections and dysentery were the most common diseases contracted in the Moscow area. Civil Defence 50X1-HUM 11. the institutes of higher learning were little concerned with civil defense programs or instruction. Special groups instructed in the enforcement of civil defense measures had been formed at the Institute. 50X1-HUM Evaluation of VUZ Training 50X1-HUM 12. students did not consider their VUZ training courses as being difficult. Emphasis on specialization occurred during the last year and then only in a limited sense. In the 50X1-HUM scientific and technical fields the courses of instruction did not demand intensive study nor an understanding of the basic theories relative to the particular subjects. The staff of the Eastitute was well qualified to instruct, the respective courses and the materials and equipment used during the class periods were adequate. 50X1-HUM 13. COMPTERMITAL 50X1-HUM
